(850) 941-1800

Terry,

I want to thank you for the work Exhibit Engineering LLC performed for us on the Medal of Honor Project. The periscope interactive exhibit installed on the aircraft carrier Yorktown, at Patriots Point, South Carolina has been a real hit with the visitors. Although not usually found on aircraft carriers, the periscope compliments the nearby recognition of a great submarine Commander, and submerges the visitor further into the story environment.

As many museum projects go this was not without its challenges, but Exhibit Engineering LLC provided a great looking, robust unit that is sure to wear well for many years. Your willingness to provide support beyond the contract obligations has not gone unnoticed, and Exhibit Concepts will continue to look to Exhibit Engineering LLC for future interactive exhibits.

I highly recommend Exhibit Engineering LLC be considered when technical, interactive exhibits are required.

Thank you and I look forward to working together on future projects.

Duane Landes
